

# NOTICE

Hello, valued customer.

In this kit, you may notice a different IQV Series battery than expected.

Due to global component shortages, Ingersoll Rand is excited to provide you with an improved battery to work seamlessly with your kit.

While providing the same power, these sustainable batteries will provide more cycles per charge thereby extending the time in between charges.

Further, these batteries will have double the life (number of charge cycles) – thus reducing the frequency of waste and impact to the environment.
